Sponsorship brief — 2026-2027

TeamElGhazi Digital Education Programme

You fund it. We deliver it. Students, teachers and young people who cannot afford it learn to use digital tools and AI.

The need

In Morocco and across French-speaking Africa, many schools, associations and young people lack the tools, the training and the support to learn computing and artificial intelligence. Teachers also lack time and suitable materials, in French as in Arabic.

What TeamElGhazi delivers

TEMO, the AI tutor — guides each student question by question so they find the answer themselves.

AI, Python and digital training — for students, young people and teachers, online or in class.

Teaching materials — worksheets, exercises and projects in French, Arabic and English.

Admin automation — enrolment, attendance, reminders and follow-up for the school or association.

You choose your programme

A class

one group of students over a full cycle.

A school

students, teachers and administration.

An association

its young people and facilitators.

A region

several schools in one area.

What you receive

- A real activity report: sessions delivered, content, participation.
- Visibility only if the beneficiaries agree. No school or student is named without consent, and no identifiable photo of a child is used.
- A programme delivered end to end by TeamElGhazi: preparation, sessions, materials, follow-up.

Budget

Quote on request, programme by programme, based on the teamelghazi.com price list. TEMO: quote on request.

Next step

A short call to understand your priorities, then a written proposal for the programme you choose.

TeamElGhazi work

teamelghazi.com (FR / EN / AR site) · cimemaroc.com (Moroccan Investors Club, FR / AR site) · 5sautorentcar.com (5S Auto Rental) · AI, Python and web development training.
